

Flywire Named to PCI Security Standards Council 2025-2027 Board of Advisors

June 4, 2025

For the second consecutive term, Flywire joins other leading organizations to help shape the future of security standards and protocols

David King, Flywire's CTO, and Barbara Cousins, Flywire's CIO & CISO, leverage their extensive security and payment experience to represent Flywire on the prestigious Board

BOSTON, June 04, 2025 (GLOBE NEWSWIRE) -- [Flywire Corporation](#) (NASDAQ: FLYW) (Flywire), a global payments enablement and software company, today announced that it has been named to the PCI Security Standards Council (PCI SSC) 2025-2027 Board of Advisors. Flywire's Chief Technology Officer (CTO), David King, and Chief Information Officer / Chief Information Security Officer (CIO / CISO), Barbara Cousins, will represent Flywire on the PCI SSC Board of Advisors and provide their expertise to help shape the future of payment security.

Flywire's second consecutive appointment to the PCI SSC Board of Advisors builds on the Company's longstanding relationship with the PCI SSC. Flywire's CTO David King has regularly been Flywire's representative as a Participation Organization on the PCI SSC. Additionally, King was part of the original team in 2003-2004 that helped to draft the initial version of PCI DSS 1.0. King will now bring his technical insights, expertise, perspectives and ideas to help shape the development of forthcoming security standards and programs.

"We are incredibly proud to join the PCI SSC Board of Advisors and continue the important work designed to create more secure, compliant payment solutions across industries," said David King, Flywire CTO. "It is a very dynamic landscape for payments security, and we are excited to apply our unique expertise working in highly regulated industries to help solve the most pressing payments challenges of our time."

The appointment also validates Flywire's commitment to maintaining the security and integrity of the payments it delivers across the industries it serves. Flywire prioritizes robust security and compliance, demonstrating this commitment through rigorous internal controls and adherence to the highest industry standards. Flywire is PCI DSS Level 1 certified, the most stringent level for credit card data security, and undergoes annual SOC II Type II audits, attesting to their strong information management processes. Beyond these foundational certifications, Flywire proactively manages global regulatory requirements, maintaining comprehensive Anti-Money Laundering (AML) / Counter-Terrorist Financing (CTF) programs and complying with various data protection laws like GDPR, CCPA, PIPEDA, HIPAA and FERPA.

Flywire's security capabilities are a key differentiator for many of the company's global clients. For Nordic Visitor, one of the largest tour operators in Scandinavia, Flywire's robust security and compliance features were paramount in its decision to select Flywire to be its international payments provider:

"Flywire's solutions are much more modernized and capable of handling new technology. Security was a main driver for choosing Flywire, along with the cost savings," said Magnus Freyr Erlingsson, Chief Operating Officer at TravelConnect, which oversees operations of Nordic Visitor.

"At Flywire, being a leader in security and compliance isn't just about meeting regulatory checkboxes; it's about building and preserving the fundamental trust our clients and their customers place in us," says Barbara Cousins, CISO of Flywire. "We have always maintained proactive and superior security protocols to protect sensitive data and ensure seamless, secure transactions. We are thrilled to help apply our knowledge and expertise to help contribute to a more secure and reliable financial future for everyone."

"The Board of Advisors provides industry expertise and perspectives that influence and shape the development of PCI security standards and programs," said PCI SSC Executive Director Gina Gobeyn. "We look forward to working with Flywire in our efforts to help organizations secure payment data globally."

About the PCI Security Standards Council

The PCI Security Standards Council (PCI SSC) leads a global, cross-industry effort to increase payment security by providing industry-driven, flexible and effective data security standards and programs that help businesses detect, mitigate and prevent cyberattacks and breaches.
